## Does it take a killer to catch a killer?

**Dark Minds** brings fresh eyes to unsolved serial killer investigations using the combined instincts of three unique perspectives. Retracing the homicides are two obsessive investigators - John Kelly, psychologist/criminal profiler and M. William Phelps, true crime author/investigative journalist. M. William Phelps lost his sister-in-law, who was five months pregnant, to a suspected serial killer, fuelling his passion to hunt for answers in other such cases. John Kelly is one of today's pre-eminent serial killer profilers and is the founder of S.T.A.L.K. Inc. (System To Apprehend Lethal Killers). Joining them is an unlikely and

anonymous source: a convicted multiple murderer known only as '13'. Wishing to make amends by helping catch other killers, '13' uses his own personal experience to formulate theories behind these chilling cold cases. The killer participates willingly, anonymously and without payment.

These criminals are still out there. Their identity and whereabouts are unknown. But Phelps and Kelly go looking and shine a light into the darkest corners of human behaviour. Their mission is to hunt justice, by retracing the crime and piecing together a profile of the killer by interviewing

key people - cops, forensic scientists, survivors, family, witnesses. These investigations resemble a prime-time detective drama but this is real; the murders, victims, unanswered questions, breakthroughs, dead-ends, horror and emotion. We're along for the ride and it's an exclusive and shocking journey inside each case and inside each murderer's psyche.
